Columbia, SC 29201

Dear Mr. Carswell:

RESULTS OF FECAL COLIFORM TESTING IN FOURMILE BRANCH AT THE SAVANNAH RIVER SITE (SRS)

Ref: TMDL for Fourmile Branch at Water Quality Monitoring Site #RS-02470

Attached are the laboratory results for fecal coliform samples collected by Washington Savannah River Company (WSRC) from Fourmile Branch at the referenced sampling location during January 2006. Original data sheets and chains of custody are provided. All results were less than 100 colonies per 100 milliliters of sample. WSRC hopes that these five sample results will enable SCDHEC to remove this location from the South Carolina list of impaired waters.

Please call me at (803) 952-7989 if you have any questions or need additional information.

Yours truly,

W. L. Payne
